Théo Michelot

Chase Building, 6316 Coburg Road ⋄ Halifax B3H1Z9, Canada

`theo.michelot@dal.ca`

EDUCATION

PhD in Statistics   *2016-2019*
University of Sheffield, UK
Stochastic models of animal movement and habitat selection

MSc in Mathematical and Software Engineering   *2010-2015*
INSA de Rouen, France

EMPLOYMENT

Assistant professor in Statistics   *Since August 2022*
Dalhousie University, Halifax, Canada

Lecturer in Statistics   *January-July 2022*
University of St Andrews, UK

Postdoctoral research fellow   *2019-2021*
University of St Andrews, UK
Development of flexible continuous-time stochastic processes with applications in ecology

OTHER RESEARCH EXPERIENCE

Research placement   *July-December 2015*
University of St Andrews, UK
Development of an R package for the analysis of ecological data with hidden Markov models

Research placement   *June-September 2013*
University of St Andrews, UK
Analysis of ecological and financial data with hidden Markov models

IN PREPARATION

Michelot, T., Klappstein, N.J., Potts, J.R., Fieberg, J. Understanding step selection analysis using numerical integration.

Storey, E., **Michelot, T.** Scale dependence in hidden Markov models of animal movement.

Invernizzi, E., **Michelot, T.**, Ng, N., Macqueen, E., Rouviere, A. and Sasaki, T. Using hidden Markov models to study ant collective behaviour: self-organised building activity regulated through a feedback loop.

Chance, A.M., Demarais, S., Strickland, B.K., Street, G.M., McKinley, W., **Michelot, T.** Mortality or mating: what drives male white-tailed deer movements during breeding season?

SOFTWARE

I have developed several software packages for the R programming language, including:

- **moveHMM**: Analysis of animal movement data with hidden Markov models. Available on CRAN: `cran.r-project.org/package=moveHMM`. Lead developer and maintainer.

- **momentuHMM**: Analysis of multivariate ecological data with hidden Markov models (extension of moveHMM). Available on CRAN: `cran.r-project.org/package=momentuHMM`. Co-developer.

- **hmmTMB**: Hidden Markov models with non-parametric and random effects. Available on Github: `github.com/TheoMichelot/hmmTMB`. Lead developer and maintainer.

- **smoothSDE**: Varying-coefficient stochastic differential equations. Available on Github: `github.com/TheoMichelot/smoothSDE`. Lead developer and maintainer.

BOOK CHAPTERS

Antinori P., **Michelot T.**, Lescuyer P., Müller M., Acosta-Martin A.E. (2019)
Detection of unknown chemical adduct modifications on proteins: from wet to dry laboratory
In: Evans C., Wright P., Noirel J. (eds), Mass Spectrometry of Proteins
Methods in Molecular Biology, vol 1977. Humana Press, New York, NY.

TEACHING

Lead instructor
- STAT1060 Introductory Statistics for Science and Health Sciences, Dalhousie University   *Winter 2023*
- MT5758 Multivariate Analysis, University of St Andrews   *Spring 2022*

Guest lecturer
- MT4113 Computing in Statistics, University of St Andrews   *Fall 2019*
- Ecological Modelling, University of Lisbon   *Fall 2019*

Teaching training
Fall 2019

Academic Staff Development Programme, University of St Andrews

- Assessment and feedback (half-day workshop)
- Effective lecturing (half-day workshop)

Workshop lecturer and demonstrator
Hidden Markov models for animal movement and other ecological data

- One-day workshop in Cape Town, South Africa. *June 2022*
- Two-day workshop in St Andrews, UK. *August 2017*
- Three-day workshop in Mossel Bay, South Africa. *March 2016*

Tutorial demonstrator and marker
2016-2018

University of Sheffield

- MAS113 Introduction to Probability and Statistics (first year)
- MAS275 Probability Modelling (second year)
- MAS223 Statistical Inference and Modelling (second year)
- MAS6002 Statistical Laboratory (MSc)

STUDENT SUPERVISION

MSc dissertations

Emma Storey (U. of St Andrews) *May-August 2022*
Topic: *Scale dependence in hidden Markov models of animal movement*

Tom Morgan (U. of St Andrews) *May-August 2022*
Topic: *Modelling the effect of financial market on bitcoin volatility*

MSc research placements

Carlina Feldmann (U. of St Andrews, with Theoni Photopoulou) *October-November 2019*
Topic: *Spatially-explicit models of animal movement for acoustic detection data*

Hugo Hervé (U. of St Andrews, with Len Thomas and Richard Glennie) *June-August 2019*
Topic: *Simulation study of multiple imputation techniques for the application of hidden Markov models to irregular and noisy telemetry data*

Honours projects

Mairi McHale (U. of St Andrews, with David Borchers) *2019-2020*
Topic: *Analysis of snow leopard movement data using hidden Markov models*

Student examination

Bantu Halam (U. of Cape Town, Department of Statistical Sciences) *September 2019*
External examiner for MSc thesis: *Mining a large shopping database to predict where, when, and what consumers will buy next*

GRANTS AND AWARDS

NSERC Discovery Grant
2023 – 2028

"*Modelling animal movement and habitat selection across scales*"
$135,000

NSERC Discovery Launch Supplement
2023

$12,500

Best 2020 paper in JABES

For "*Varying-coefficient stochastic differential equations with applications in ecology*" (Michelot et al., 2021)

Young Biometrician Award – honourable mention   *2021*

For "*Inference in MCMC step selection models*" (Michelot et al., 2020)

International Biometric Society (British and Irish Region) and Fisher Memorial Trust

Best student talk award   *2016*

International Statistical Ecology Conference

PRESENTATIONS

Varying-coefficient stochastic differential equations
Invited talk at the Joint Statistical Meeting, online. August 2022.
Invited talk at the JABES showcase of the International Biometric Conference, online. October 2022.

Detecting behavioural responses from movement data using stochastic differential equations
Talk at the International Statistical Ecology Conference, online. June 2022.

Multiscale models of animal movement and space use
Seminar at Dalhousie University, Halifax, Canada. February 2022.

Introduction to analysing animal movement data in R
Webinar of Ecological Forecasting Initiative & Ecological Society of America. February 2022.
Recording available online.

hmmTMB: hidden Markov models with non-parametric and random effects
Talk at the meeting of the National Centre for Statistical Ecology, online. June 2021.

Time-varying diffusion processes in movement ecology
Talk at the virtual International Statistical Ecology Conference, online. June 2020.

Linking scales of animal movement using statistical samplers
Invited seminar at the University of Alberta, Edmonton, Canada. March 2020.

Behavioural response studies of beaked whales using accelerometer data and diffusion models
Talk at the British Ecological Society conference, Belfast, UK. December 2019.

Spline-based diffusion models and application to accelerometer data
Invited seminar at the University of Glasgow, UK. November 2019.
Seminar at the University of St Andrews, UK. November 2019.

Hidden Markov models of animal movement and behaviour
Invited seminar at the University of Lisbon, Portugal. November 2019.
Invited talk at the congress of Soc. Portuguesa de Estatistica, Amarante, Portugal. November 2019.

Modelling animal movement and habitat selection across scales
Invited talk at the annual meeting of the BES movement ecology group, Sheffield, UK. July 2019.

The Langevin diffusion as a model of animal movement and habitat selection
Talk at the meeting of the National Centre for Statistical Ecology, Edinburgh, UK. June 2019.

Modelling animal movement and habitat selection across scales
Invited seminar at the School of Biosciences of the University of Cardiff, UK. March 2019.

Analysing telemetry data with hidden Markov models
Invited seminar at the Duke University Marine Lab, Beaufort, USA. March 2019.

Do animals move like statistical samplers?
Talk at the Research Students' Conference in Statistics and Probability, Sheffield, UK. July 2018.

Markov chain Monte Carlo as a model of animal movement and space use
Talk at the International Statistical Ecology Conference, St Andrews, UK. July 2018.

moveHMM and momentuHMM – Analysing animal movement in R
Invited tutorial at the moving2gather meeting, Montpellier, France. December 2017.

Can animals do MCMC? Linking resource selection and step selection models
Poster at the Bio-logging symposium, Konstanz, Germany. September 2017.

From movement to space use
Flash talk at the BES movement ecology group meeting, London, UK. July 2017.

momentuHMM: an R package for the analysis of general telemetry data using hidden Markov models
Talk at the EURING meeting, Barcelona, Spain. July 2017.

Can animals do MCMC? Integrating resource selection and step selection
Talk at the meeting of the National Centre for Statistical Ecology, Canterbury, UK. June 2017.

Analysing animal movement data with moveHMM – Conservation action plan for the wild haggis
Talk at the International Statistical Ecology Conference, Seattle, USA. June 2016.
Best student talk award

Multistate Ornstein-Uhlenbeck processes for modelling animal movement
Talk at the Research Students' Conference in Probability and Statistics, Dublin, Ireland. June 2016.

moveHMM: an R package for modelling animal movement with hidden Markov models
Seminar at the Australian Antarctic Division, Hobart, Australia. June 2016.
Seminar at the Sea Mammal Research Unit, St Andrews, UK. November 2015.

A statistical introduction to animal movement modelling
Talk at the German Statistical Week, Hamburg, Germany. September 2015.

COMMUNITY INVOLVMENT

Associate Editor   *Since 2021*
Journal of Statistical Theory and Practice

Reviewer
Advances in Statistical Analysis (2020), *Animals* (2019), *Ecography* (2018), *Ecological Applications* (2017), *Ecological Monographs* (2019), *Ecology* (2023), *Ecology and Evolution* (2016, 2017), *Ecology Letters* (2019), *Emu - Austral Ornithology* (2018), *Fish and Fisheries* (2021), *Fisheries Research* (2023), *Journal of Agricultural, Biological, and Ecological Statistics* (2017, 2018), *Journal of Animal Ecology* (2019, 2022), *Journal of Mammalogy* (2018), *Journal of the Royal Statistical Society Series C* (2023), *Journal of Statistical Theory and Practice* (2022), *Journal of Zoology* (2019), *Marine Ecology Progress Series* (2022), *Mathematical Biosciences* (2023), *Methods in Ecology and Evolution* (2016, 2017×3, 2018, 2021, 2022), *Movement Ecology* (2016×3, 2019, 2020×3, 2022×2), *Nature Ecology & Evolution* (2020), *Oikos* (2022), *Plos One* (2018), *Scientific Reports* (2018, 2019), *Sensors* (2021).

Early career researcher representative   *2019 – 2022*
Executive committee of the National Centre for Statistical Ecology, UK

Seminar organiser
Dalhousie Statistics seminar series   *Since 2022*
National Centre for Statistical Ecology seminar series   *2021 – 2022*

OTHER SKILLS

Programming	R (including Rcpp, Stan, TMB), C++, Python
Tools	git, Latex, R development tools (devtools, unit testing, profiling, documentation)
Languages	French, English
